PROFESSIONAL SUMMARY

Motivated and detail-oriented Bachelor of Computer Applications (BCA) graduate with a strong foundation in programming, front-end design, and full-stack web development. Hands-on experience with Bootstrap, Python, and the MERN stack through internships, training programs, and academic projects. Seeking an entry-level software or web development role to apply technical skills, contribute to innovative projects, and grow professionally in a dynamic organization. Trained in Artificial Intelligence and Generative AI, with experience in developing models, working with NLP, and utilizing AI frameworks to create smart and scalable solutions.

EDUCATION

Bachelor of Computer Applications (BCA) 2022-2025
University of Calicut, India

SKILLS

Programming Languages : Java , C++ .
Web Technologies : JavaScript , CSS, Bootstrap.
Databases : MySQL , MongoDB .
MERN Stack & Frameworks : React.JS, Node.JS, Express.JS.

OTHER SKILLS

- Full-Stack Web Development (MERN)
- Object-Oriented Programming (OOP)
- Database Management
- Problem Solving & Debugging
- Front-End Web Design & UI/UX Basics
- REST API Development
- Basic AI & Cloud Computing Concepts
- Team Collaboration and Communication Skills

CERTIFICATIONS

- MERN Stack Certificate: Certified in MERN Stack Development with hands-on experience in building full-stack applications using MongoDB, Express.JS , React.JS, and Node.JS, including REST APIs, authentication, and deployment.
- AI for All Program–Intel: Developed awareness of Artificial Intelligence fundamentals, its ethical usage, and its impact on industries and society.
- Introduction to Cloud Computing – Simplilearn | SkillUp: Gained foundational knowledge of cloud deployment models (public, private, hybrid), service models(IaaS ,PaaS, SaaS),and major platforms, including AWS, Azure, and Google Cloud.
- Google Play Academy Certificate: Trained in best practices for publishing and optimizing applications on the Google Play Store, including app descriptions, visual optimization, meta data management, discover ability improvement, and policy compliance.
- Completed the One Million Prompters program by Dubai Future Foundation, gaining hands-on experience in prompt engineering, generative AI applications, AI-assisted productivity, and effective communication with AI systems. The program equips learners with practical AI skills for the future workforce.

- Introduction to Artificial Intelligence–Simpli learn | SkillUp: Learned core AI concepts such as machine learning, neural networks, natural language processing, robotics, real-world applications, and ethical considerations.

EXPERIENCE

Python Technology

Company: Acura Software Solutions | 2024-2025

- Completed internship focused on Python programming and real-time project exposure.
- Participated in live demonstrations and interactive sessions with industry experts.
- Strengthened problem-solving abilities and programming fundamentals. Recognized for punctuality, dedication, and efficiency.

MERN Stack Web Development | FRONT END AND BACKEND DEVELOPER Company: ICS

IT Training Institute, India | 2025-2026

- Developing full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Building responsive front-end components and scalable backend APIs.
- Designed responsive and visually appealing websites using Bootstrap.
- Utilized grid systems, reusable components, and utility classes to build mobile – first designs
- Focused on clean UI/UX practices and cross-device compatibility.
- Continuously improving front-end skills to deliver high-quality user interfaces.

PROJECT

AI-Powered Public Safety Platform - Academic Project

- Developed an AI-based public safety system integrating computer vision, machine learning, and IoT sensors.
- Implemented real-time anomaly detection, predictive risk modeling, and environmental monitoring. Achieved a 15–20% reduction in incidents, 40% faster response times, an 98% accuracy in crowd- density estimation.
